🏥 HealthCare+

Medical Appointment Booking System

📋 Project Description

A comprehensive healthcare web application built with React that allows users to book medical appointments, find doctors, and manage their healthcare profile efficiently.

✨ Features

🔒 User Authentication

Secure login and signup system with form validation

🧑‍⚕️ Doctor Search

Find healthcare providers by specialty and location

📅 Appointment Booking

Schedule appointments with selected doctors

👤 Profile Management

User profile and medical history management

⭐ Reviews & Ratings

Patient feedback system for healthcare providers

💬 Instant Consultation

Virtual consultation booking system

🛠️ Technology Stack

React.js HTML5 CSS3 JavaScript React Router Create React App

🚀 Installation & Setup

Prerequisites

- Node.js (version 14 or higher)
- npm or yarn package manager

Installation Steps

```
# Clone the repository
git clone https://github.com/yourusername/healthcare-website.git

# Navigate to project directory
cd healthcare-website

# Install dependencies
npm install

# Start development server
npm start

# Open browser and visit
http://localhost:3000
```

📁 Project Structure

```
healthcare-website/
  public/
    index.html
    favicon.ico
  src/
    components/
      Navbar/
      SignUp/
      Login/
      FindDoctorSearch/
      AppointmentBooking/
      Notification/
      Reviews/
      Profile/
    App.js
    index.js
  package.json

Bedside Manner

| Good | ⌄ |

Detailed Review

Dr. Johnson was very thorough in her examination and took the
time to explain my condition in detail. She listened carefully to
my concerns and provided clear treatment options. The staff
was professional and the wait time was reasonable. I felt well-
cared for throughout my visit.
